Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The stone house is a two-story stone structure with a main facade constructed of brick. The structure is built in a square plan. It is four-bays by three-bays and has a full-length, one-story front porch. The main facade is asymmetrically arranged. It has entrances in the first and third bays from the west on the main story and in the third bays from the west on the second story. Other bays on the first story have large two-over-two sash windows. The other three bays on the second story of the main facade and the three bays on the second story of each end have six-over-six sash windows. The structure has a hipped roof.

The property is located on the north side of Sandy Hook Road, approximately .01 mile west of Clark Road in Sandy Hook. The structure sits right on the road and is built up in a slight slope with a high foundation on the main facade. The main facade faces south.

The two-story structure has a main facade of brick laid in stretcher bond. The rear of the walls of the structure are rough-laid fieldstone. The full-length, one-story front porch sits on a high fieldstone foundation with lattice-work under the porch. The porch has a hipped roof supported by chamfered posts with a stick railing. The first story has four paneled doors with two-pane transoms in the front and the third bays from the west. The other two bays have large two-over-two sash windows of a commercial style. The second story has a four-paned door with transom in the third bay from the west. Six-over-six sash windows are located on the other bays. The structure has a large boxed cornice with plane frieze. The first story of the sides of the house is unfenestrated. On the second story six-over-six sash windows are located in each bay. The east facade has a exterior-end brick flue.

There are no significant outbuildings on the property.
